

# Colloidal Silver

Colloidal Silver has been successfully tested for decades at numerous laboratories worldwide. It has been found to be effective on microbiological organisms. One researcher, Alfred Searle, in describing the effects of Silver, states that for internal administration, either orally or hypodermically, Silver has the advantage of being “Rapidly fatal to parasites, both bacterial or otherwise, without any toxic action on the host”.

Under normal conditions we get Silver and other minerals vital to health from the food we eat. The minerals mix in the soil with other living organisms that help plants assimilate them. Unfortunately, depleted soil, as well as pesticides, insecticides and chemical additives in our foods, food irradiation, dyes, emulsifiers, thickening agents and thinning agents can block our ability to absorb Silver from food.

## Medical Research

Dr Leonard Keene Hirschberg of John Hopkins says, “Speaking generally, the colloidal metals are especially remarkable for their beneficial action in infective states – blood poisoning by germs. This action has been shown to be due to their stimulating influence and to their toxins as shown by the immediate fall of temperature and the subsidence of the constitutional symptoms of intoxication”

Dr Henry Crooks has found that Silver in the Colloidal state is “highly germicidal, quite harmless to humans and non-toxic. It is not addictive and the body doesn’t build up a tolerance to it. It has absolutely no known negative effect on any human organ. It is tasteless, odourless, non-stinging and harmless to the eyes and skin. It can also be mixed with other medications without incident.”

It is also perfectly safe for children and pets.

The conclusion of extensive ongoing medical studies was stated by Sir Malcolm Morris. “Colloidal Silver is free from the drawbacks of other preparations of Silver, instead of producing irritation it has a distinctly soothing effect.”

## Effective Uses

Colloidal Silver has been used effectively on the following conditions: -

Acne	Allergies	Appendicitis	Boils
Bladder Inflammation	Rheumatoid Arthritis	Septic Throat	Cystitis
Blood Parasites/Poisoning	Dysentery / Intestinal trouble	Shingles	Influenza
Candida	Cerebro-Spinal Meningitis	Cholera	Gonorrhoea
Chronic Fatigue	Yeast Infection	Conjunctivitis	Impetigo
Vincent’s angina	Spring Catarrh	Tinea Versicolor	Sore throat
Soft sores	Suppurative Appendicitis	Pustular Eczema	Sprue
Chronic Eczema	Blind boils of the Neck	Inflammation	Cancer
Diabetes caused by infection	Viral Stomach Ulcer	Whooping Cough	Septicaemia
Irritation of the Bladder	Leucorrhoea	Hemorrhoids	Ear Infection
Warts & other Dermatitis	Eustachian Tubes	Pruritis	Colitis
Bromidrosis of Axillae/Feet	Puerperal Septicaemia	Enlarged Prostate	Septic Mouth

The uses for Colloidal Silver seem to be endless and appear to be limited only by the imagination. It can be taken internally and used topically. It works well for not only humans, but also animals, fish and plants.
